PROFILE

Air Service Training, (AST) has been providing aeronautical engineering training to the world's airlines, maintenance organisations and military formations for 75 years.

AST is Part 147 approved to offer courses and examinations to meet the requirements of the Part 66 Aircraft Maintenance Licence in all currently available A & B Categories.

Additionally AST offers short modular courses and examinations, or examination only to meet the requirements for national licence conversion, initial licence issue following the "self-improver" route and extensions to basic Part 66 Licence categories.

AST can also offer innovative bespoke training solutions to meet all engineering needs, and in partnership with Perth College UHI offers academic awards in Aeronautical Engineering up to Bachelor of Engineering degree level.

HIGHLIGHTS

- Approved training and examination for all Part 66 AML Categories
- Flexible commencement dates
- Bespoke courses to meet individual and sponsor needs
- On-site delivery of engineering short modular courses
- Opportunity to articulate onto BEng degree following approved course completion
- Partnership with a major type training provider allows delivery of type training post graduation
