PROFILE

Oxford Aviation Academy (OAA) is the world's leading independent provider of aviation training, personnel solutions and technical support services. The OAA Group offers professional pilot training from ab initio through to type rating – including base and line training. Cabin Crew and EASA 147 Engineer training courses are also provided as well as aviation resourcing and technical support services through Parc Aviation.

The scope, range and breadth of OAA's services represents more than 150 years of combined experience in the industry. OAA is well placed to meet the needs of customers worldwide with 11 training centres conveniently located at major airports throughout Europe, North America, Australia and Asia Pacific.

AVIATION TRAINING – AB INITIO

We deliver both Integrated and Modular ab initio training for JAA and CASA professional pilot licences from our three purpose built campus training centres in: Oxford (UK), Phoenix (USA) and Melbourne (Australia) – with a combined capacity to train up to 800 students per annum. We operate a fleet of 120 aircraft, 16 simulators and deliver ATPL ground training in an interactive, media rich environment.

AVIATION TRAINING – TYPE

We provide a wide range of type-rating courses from regional jets and turboprops through a range of Airbus, Boeing, Fokker and Embraer types under approvals issued by JAA, Chinese and Hong Kong authorities. We are manufacturer approved by Airbus, Embraer, Saab and BAE SYSTEMS. Cabin Crew training is also available for most aircraft types. We also offer 'differences' training and command training courses as well as the ability to tailor bespoke courses of training to meet individual airline needs.

AVIATION RESOURCING – PARC AVIATION

Parc Aviation (now part of the Oxford Aviation Academy Group) is the world's leading supplier of personnel solutions to the aviation industry. Parc Aviation provides flightcrew leasing, technical support, aircraft movement and aircraft lessor services to both airlines and leasing companies worldwide.
