PROFILE

The Pilot Training College (PTC) is an Irish Aviation Authority (IAA) registered and certified flight training organisation (JAA IRL/FTO-005-03).

We believe that quality training produces quality pilots. Our graduates are in demand by many of the industry's premium airlines. We offer an airline cadetship programme on behalf of Flybe which included 14 students in 2008.

PTC operates two JAA flight training facilities – one in Florida, USA and one in Waterford, Ireland. The US school is based at the Florida Institute of Technology, where students are trained on the latest technology including glass cockpit, autopilot and GPS equipped aircraft.

The Pilot Training College offers a variety of VFR training up to CPL/MEP level in Florida followed by ME/IR training in Ireland.

Our courses include:

- The PTC Airline Pilot Programme
- The PTC Modular Airline Pilot Programme
- A BSc Degree Course in Airline Transport Operations which includes a JAA ATPL (in association with the Waterford Institute of Technology)
- JAA ATPL Groundschool in Florida
- JAA ATPL Distance Learning
- JAA Conversion
