PROFILE

We Qualify! Customised maintenance programmes are the basis for the safety of passengers and crews alike. They rely on highly trained professionals that possess an unquestionable level of expertise.

We are an acknowledged and highly regarded European service provider for PART-147/PART-145/PART-66 qualifications. We bring your engineers and technicians up to the highest industry standards in aircraft maintenance so that your fleet keeps flying safe and flying high.

Please browse the website for an outline of some of our products and solutions we offer. If your specific requirement is not listed we construct our courses to suit you.

From one day courses on our sites (Bordeaux and Brussels) to customer site Type courses, we can include all services.

With approved instructors, first-class facilities, Airbus maintenance training simulators and complete manufacturer documentation, we maintain the highest standards. Contact us now, for further details.
