improving management . . .
. . . improving safety

PROFILE

Shape Aviation is a high-quality provider of expert consultancy and training services within the fields of air operations and ground operations, specialising in:

- Quality, safety and risk management systems consultancy
- Training in QMS, SMS, IMS, security and dangerous goods
- Auditing services and auditor training
- Incident investigation and emergency response management

We understand the complexity of the modern aviation world and the increasing workload for management and staff. We strive to make our training and consultancy services straightforward, easy to manage and cost-effective.

Shape Aviation's commitment to its clients' continual business improvement has created a formidable reputation to date, because we believe that safe operations, good management and bottom line profitability are inextricably linked.

HIGHLIGHTS

- For JAR and EASA regulatory compliance
- For air ops, ground ops, maintenance and training
- For integrated safety management
- For management partnership
- For incident investigation and emergency response
- For corporate governance, business improvement and excellence
