### PROFILE

Swiss AviationTraining Ltd., a wholly owned subsidiary of SWISS, has the status of a fully licensed flight training organisation/type rating training organisation.

We offer type training courses and customised maintenance training for various aircraft types (Embraer ERJ 135/145, EMB 170/190, BAe146/Avro RJ series, Saab 2000). All certificates are approved and recognised by EASA, China's CAAC, Australia's CASA and the FAA.

Our type-specific pilot training courses are tailor made. We are approved by JAA/EASA and FOCA and approved for EMB 170/190 training by the FAA, CASA, CAAC and GACA.

The cabin crew training courses comply with all EU-OPS requirements and cover initial, type conversion, recurrent and crew resource management training (CRM) for various aircraft types (including emergency, safety, medical and service procedures).

Our human factors and CRM training courses include train-the-trainer programmes, basic human factors training, CRM, multi-crew co-operation and human factors training for maintenance personnel.

### HIGHLIGHTS

- Technical crew type specific and general training
- Ab-initio pilot training
- Trainer training
- Flight crew type specific and general training
- Human factor training
- Cabin crew type specific and general training
